

WORKERS FOR WORLD PEACE

Although we follow with our hopes and our prayers the efforts of the many sincere workers for peace in the world today, we sometimes wonder why such endeavor should be necessary. We feel sure that the average man and woman in other countries are like ourselves. They want no war.

Has it occurred to you that many of these peoples, peace loving though they may be, are deprived of the information that would enable them to choose wisely their course of action? Instead of news they are given propaganda. The facts are colored or misrepresented or suppressed. They have been robbed of the right to think for themselves.

Perhaps a permanent peace could have no better practical foundation than a free press throughout the world. We who have free access to all the news, take it for granted and treat it lightly. Yet, having this pledge of freedom, we should cherish it, bringing our children up in the knowledge and appreciation of this safeguard to their liberties.

Use your opportunities to be fully informed on all matters that affect your life. Give your family the benefits that a good newspaper can bestow.

FRIENDLY CIRCLE HELD MEETING

The Chinook Friendly Circle held their October meeting at Mrs. Morrell's home. There was a large attendance of the members. Five new ladies joined the Circle.

A very enjoyable afternoon was spent by all present. Mrs. Jas. Aitken was the winner of the "bird contest."

A dainty lunch was served by the hostess. The Club will meet on November 10th, at Mrs. L. Robinson's home.

The Ladies' Card Club Met Tuesday Night

The Ladies' Card Club met on Tuesday evening, at Mrs. Pfeiffer's home. The honors were shared by Mrs. Lee and Mrs. Targott.

The Club will meet next week at Mrs. Wilson's home.

Born—To Mr. and Mrs. G. Cook at the Cereal Hospital—a son.

Born—To Mr. and Mrs. John Demaree, of Granum, on Oct. 3rd, —a son.

Mr. and Mrs. E. B. Allen of Mannville, wish to thank the friends of the Chinook district for their kind hospitality during their short visit. Regretting that they were not able to see all their friends,

Former Magistrate and Pioneer of Oyen District Leaves For Calgary

Oyen, Oct. 18th—last week Mr. and Mrs. G. S. Peck, pioneer residents of this district left to make their home in Calgary, where they are now living on Sunnyside boulevard.

While farming three miles from Oyen on the highway where their fine home was for many years one of the land marks, and later as residents of the town, Mr. and Mrs. Peck were outstanding citizens who had a large share in building the community. Mr. Peck took pride in good horses and was an active member of the Oyen Agricultural Society and the Fairs Association. He served for many years as Magistrate. Mr. and Mrs. Peck were the mainstay of All Saints Anglican Church and were active in the interests of the Bible Society. Mrs. Peck was for several years president of the district W. A. and was originator of the women's world Day of Prayer organization for this community.

Their four sons who all farmed here in the early days are now scattered; Edward in Samaliland, Africa; Oswald in Ottawa; Hubert at Cochrane, Alta., and David who resided on the farm here until last year when he bought another near Lacombe. There he erected a new house from the dismembered one he took with him from the homestead, leaving thereby a large blank in the local landscape.

TWO ACCIDENTS OCCURRED

Mr. Fred MacDermott, of Iron River, Alta., met with an accident while assisting with the harvest work on Mr. Carlson's farm, half a mile from town, when he was accidentally struck a heavy blow on the face, which required to have stitches. On Thursday he started to help with putting tar on roof of Garage. He was holding a burning torch near a barrel of tar which exploded, his face being badly burned. He was again rushed to the Cereal Hospital.

Apparently, the town boys took our advice a few days ago. Anyway last Thursday seemed to be their lucky night. The girls for some reason came down off their high horse and attended the show.

You can't be up to the young folks now-a-days. No wonder the girls like to parade the streets after supper. The boys finally took the hint Thursday night. Guest the Restaurant and Filing station operators are not sorry two at a time. Maybe that was due to circumstances, though.

Did you notice the well dressed couple at Cereal, last Thursday. No doubt the gentleman wanted to make a hit with one of the Chinook Grade XII students.

A Lesson From Europe

If the recent crisis in Europe has taught Canadians anything, they must surely have learned the value of unity, in which it is truly said, lies strength. The fate of Czechoslovakia in the past few weeks has demonstrated to the entire world the truth of the old adage, "United we stand; divided we fall."

There is no gaining the statement that had it not been for internal dissension between the elements comprising the population of Czechoslovakia, Hitler would have had no good ground for taking the steps which have resulted in the dismemberment of the 20-year-old central European democracy.

Including, as its boundaries do—or should we say, "did"—a number of racial minorities, Czechoslovakia would have been an unimpaired entity today had the views and aspirations of these minorities been welded into an homogeneous whole with those of the Czechs and Slovaks themselves.

Had it not been for the dissension within the Czechoslovakian borders the German chancellor would have had no reason for intervening that would have stood the test of world opinion, and likewise Chamberlain of Great Britain and Daladier of France would have had no reasonable excuse for according to Hitler's demands, nor would they have had the support of their constituents at home in so doing.

It would be as well for the people of Canada, secure though this country may seem from "outside" interference at the present time, to heed the lesson which may be learned from recent history as exemplified in the partitioning of Czechoslovakia, and to remember that a house divided against itself is destined to fall sooner or later.

Outstanding Difficulties

While there may be little reason to fear serious division in the country on racial lines, there is a danger of ideological differences becoming accentuated unless a spirit of tolerance permeates the views of the people in different sections of the country. The growth of political, economic and social cults and "isms" sometimes leads to serious divisions in viewpoint and may culminate in regrettable decisions and actions, unless the great majority refuse to be stampeded from an attitude of clear reasoning and patient sanity.

Apart from these differences in ideals and ideas of a political, economic or social character, Canada faces other difficulties which must be overcome if the foundations upon which a united people were built at the time of Confederation are to endure and this country is to take its place in the sun as a virile, powerful and happy national entity.

These difficulties are not necessarily insurmountable, were recently enumerated by Dean F. C. Cronkite of the University of Saskatchewan, addressing a school teachers' convention, in support of his contention that constitutional changes are needed if the unity of the country is to be preserved, as follows:

The Maritime problem occasioned by dissatisfaction of the Maritime provinces with Confederation; the geographic problem due to the immense area and unfortunate geographic divisions; the difficulty of district regional economies typified by the agriculture west and the industrial east; conflicting racial philosophies as seen, for example, in the neighboring provinces of Quebec and Ontario; and, finally, the financial ascendancy of Ontario, where the great bulk of the nation's wealth is at present concentrated.

Patience Is Needed

One has only to read this list of obstacles to perfect unity to realize the immensity of the problem which has to be solved if this youthful nation is to realize the vision and ambitions of the Fathers of Confederation. They can be achieved to the full but only by the exercise of courage, clear thinking and a determination to reach the goal by the safe and sane methods which experience has taught are the only assurance of ultimate success.

It is to be hoped that the Rowell Commission on Dominion-provincial relations, when it reports its findings, will be able to point the way to a successful solution of these problems, and in the meantime a little patience must be exercised in anticipation that this hope will be realized before very long.

United States Cattle Quota

Canada Has Not Yet Supplied Full Amount This Year

The United States quota for Canadian cattle for 1938 will permit entry of 155,799 cattle of 700 pounds or more, 51,933 calves of less than 165 pounds in weight, and 20,000 dairy cows. To September 3, Canada had supplied 34,010 head or 21.8 per cent of the heavy cattle, 32,610 head or 60.8 per cent of the calves and 4,288 head or 21.4 per cent of the dairy cows. By August 28 of last year, the quotas of both the heavy cattle and the calves had been filled and that of dairy cows 20 per cent used up.

No newspaper reporters were present when the Wright brothers first flew, and when the story finally did reach the newspapers, very few people believed it.

Here's Quick Portable HEAT from LOW-COST COAL OIL!

Coleman
RADIANT HEATER

Makes and burns own gas from "coal oil." Fuel cost less than 1¢ an hour. Heats a room of clean, beautiful heat. Ideal for chilly autumn and spring days or as an auxiliary heater all winter long. See dealer or write: THE COLEMAN LAMP & STOVE CO., LTD., Dept. W-1408, Toronto, Ont.

Education And Workers

Persons Living In Prairie Provinces And Their Classification

Persons living in the prairie provinces with less than a high school education are found chiefly in agricultural pursuits and in semi-skilled and unskilled occupations, the Dominion bureau of statistics reported in a census bulletin.

Clerical and kindred workers and skilled artisans include a larger proportion of persons having attended school from nine to 12 years or, roughly, with a high school education. Those with 13 years or more of schooling, most with college educations, are engaged largely in professional, commercial and clerical pursuits. Almost two-thirds of the males reported less than nine years' schooling. Only about two-fifths of females fell in the same class.

Had To Get Home

For five days Ralph Pastalis lay semi-conscious at the base of a 30-foot cliff from which he had fallen. Then the 58-year-old farmer recovered sufficiently from head-injuries to crawl to a neighbor's home. Taken to hospital at Olympia, Wash., Pastalis declined to remain there, explaining he was away behind in his farm chores.

Make Good Citizens

The more one talks with Canadians who come from German or Italian stock, the more one is led to realize that while these people love the people and culture of the lands of their origin, and rightly so, they regard with abhorrence the political creeds which are now in ascendancy in Italy and Germany.

Equal In Last Analysis

But Girls Cut Their Teeth Earlier In Life Than Boys

Age for age, girls have more teeth missing, filled or decayed than boys, it was concluded in a report on a United States Public Health Service study.

This is not simply because they are girls, according to Dr. Henry Klein and Dr. Carroll E. Palmer, who made the study, but rather because a girl's teeth are cut earlier in life than a boy's and have, therefore, been exposed longer at the same age to wear, tear and germs. In the last analysis, however, the girls show no greater susceptibility to dental decay than boys.

Continuing their dental studies with students attending the municipal elementary schools of the small urban community of Hagerstown, Md., the doctors gathered the present data from examinations of 2,232 boys and 2,184 girls.

SHE WAS A VICTIM OF HEADACHES

Kruschen Got at the Cause

This woman's headaches were of the gripping kind that reduce the sufferer to something like helplessness. She tried tablets. She tried pills. All without avail. Only Kruschen could help her.

"I used to get very bad headaches," she writes. "No tablets or pills of any kind could relieve them. One morning, casually, I tried Kruschen Salts in a glass of hot water. I continued taking it, but I have not had one of those awful headaches since. Kruschen suits me better than anything else. I find it very good."

(Mrs. L. A. W.) Headaches can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen stimulate the internal organs to healthy, regular action so that no clogging waste is allowed to collect. Your inside is kept clean and serene. And that is just what Kruschen Salts brings quick and lasting relief from headaches.

To Restore Eyesight

People Are Urged To Will Their Eyes To See

Persons were urged to will their eyes to science in order to restore the eyesight of other individuals.

Dr. Ramon Castronjov, of New York City, author of the proposal, said the eye surgeons frequently can bring back the sight of persons who have suffered injury to the cornea, or front covering of the eye.

In many cases, however, the tiny pieces of cornea tissue necessary for grafting a new window into the eye are not available for replacement.

These tissues can be obtained from the eyes of stillborn infants or from corpses if the operation is done soon after death. Dr. Castronjov said. The latter source is the more reliable, he added.

It is possible to preserve the eyes in usable condition for several days, he explained. Then it would be possible to keep a supply on hand in the hospital refrigerator and to co-ordinate the number of operations with that supply.

Described In One Word

Easy To Tell What President And Dr. Dafoe Talked About

Dr. Dafoe went to Washington to visit the White House. Although Dafoe had been allotted a five-minute visit he was closeted with the President for almost half an hour. When he emerged, his publicist tried to ascertain the substance of their conversation, to deliver it to the press for exploitation. Dafoe refused, insisting that it was extremely confidential. After lengthy pleas, the distraught press agent shrieked: "Can't you tell me a word about it?" "One word? Yes," replied Dafoe. "Babies."

Leaf beetle larvae get fresh air to breathe several feet under water by thrusting their heads into the air spaces of tiny stems.

The cricket's note sometimes is so loud that it can be heard a mile away.

In Siberia, in 1908, wind from a meteor blew down forests over an area of 100 square miles.

About 7,000 persons are drowned in the United States each year.

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using healthful Wrigley's Gum daily—as millions do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today.

Canada's First Moslem Church

Modest Structure Of Brick Veneer To Be Built In Edmonton

The First Moslem church in Canada will be at Edmonton. The building permit says the owners will be the Arabian Moslem Association there. It will be a modest one-story 30x50 structure of brick veneer on 10th avenue. It will be striking to find if the congregation are all Arab for the Moslems cover a diverse number of nationalities. Of course, even in Great Britain, there have been substantial conversions to Islam and they have their mosques, so that it is surprising Canada has not before this had some churches of that faith. Already, there are 30 differing creeds in Canada and too many perhaps in serious competition. The census says there are two thousand professing Mohammedanism in this Dominion. But Islam, founded by the prophet Mahomet about 600 A.D. at Mecca, has a world membership of 200,000,000, which is about 3,000,000 greater than that of Christian Protestantism and 125,000,000 less than Roman Catholicism—Brandon Sun.

SELECTED RECIPES

CORN STARCH CAKE

1 cup white sugar
1/2 cup butter
3 eggs
1/2 cup St. Lawrence or Durham Corn Starch
1 1/2 cups flour
3/4 cup milk
3 teaspoons baking powder
1 teaspoon lemon flavouring
1/2 teaspoon salt
Cream butter and sugar until light. Add well-beaten egg yolks. Mix well. Add milk alternately with dry ingredients which have been added together three times. Add flavouring and beat well. Fold in stiffly beaten egg whites. Bake in two layers, 20 to 25 minutes, moderate oven.

JELL-O PLUM PUDDING

1 package lemon or cherry Jell-O
Dash of salt
1/2 teaspoon cinnamon
1/2 cup raisins
1 pint hot water
3/4 cup finely cut raisins
3/4 cup finely cut cooked prunes
1/4 cup finely cut citron
3/4 cup finely cut nut meats
3/4 cup Grape-Nuts
Combine Jell-O, salt, and spices; add hot water and stir until Jell-O is dissolved. Chill. When slightly thickened, fold in combined fruits, nuts, and Grape-Nuts. Turn into mold. Chill until firm. Unmold. Serve with foamy sauce or with whipped cream flavoured with nutmeg. Serves 10.
Note: One-fourth cup brandy may be added with fruits, if desired.

Expert Placer Miner

Earnings Of Blind Youth Sometimes Reach \$300 A Day

Wilton Benton, 21 years old, has not let blindness prevent him from becoming an expert placer miner. The blind youth, since going to the Black Hills near Myleo, South Dakota, with his parents in 1934, has constructed a huge water wheel, sluice boxes, laid several hundred feet of railroad track for his small ore car and tunneled into the hillside not far from the flakes of gold when they are in rille and pan. He can tell by the weight of the mineral and its sound when scratched with tin or rock. His earnings total from 50 cents to as high as \$3 a day.

The Utah Salt Flats

Extend For 200 Miles And Surface Is Very Hard

The salt flats near Salt Lake City, where John Cobb set up a new world's land speed record only to lose it a day later to Capt. Byrd, form a vast amphitheatre 200 miles in extent. The surface is so hard that wooden stakes have to be ironshod before they can be driven into it. The salt is, however, quickly cut into furrows by heavy cars travelling at high speed and has to be levelled by scrapers as soon as the salt has passed. Mr. Cobb is a car broker in London. Speed driving is his hobby.

Many a man's future is no further away than the front of his car.

Make Good Living

Progress Made By Denmark Farmers In Last 150 Years

In 1788, states the Montreal Gazette, the peasants of Denmark won their freedom from the old system of villeinage under which they were little better than workers for the great land-owners. This year the farmers and all other citizens are celebrating the 150 years of liberty and discussing with justifiable pride the progress that has been made in the century and a half. After the breaking-up of the estates the land was divided into farms, small as compared with the farms of North America but astonishingly productive and self-supporting for the families that work them.

Agriculture is the primary activity and Danish products find favor in the British and Continental markets. Exports of butter, eggs and high-grade bacon bring much wealth to the Danes on the land and there is a constant effort to retain the foreign markets.

The average farm is 15 acres and the farmer, his wife and children do all the work. With a half dozen or more cows, a couple of score of pigs, a horse or two and many hens, the family makes a fair living on the land which also provides most of the food for the animals.

This is intensive and intelligent farming, to which the government lends every encouragement in the way of loans, which also are managed intelligently. There is no fixed interest rate for these farm loans, the practice being to charge a low rate when crops are good and a low rate when they are not so profitable.

Through the co-operative societies, which have reached a high state of efficiency in Denmark, marketing of products at home and abroad is done comparatively easy matter. The farmer also buys many of his supplies through these co-operatives and is quite satisfied with his returns.

There being no coal in the country, dependence is on agriculture rather than on manufacturing and the industries. The government, accordingly, concerns itself chiefly with bringing about farm improvements and with reclaiming marsh and wooded land. As for the beech and other forests, when a tree is cut another is planted, with a view of maintaining the wood wealth. The 200,000-odd farmers in the population of 3,500,000 or thereabouts seem to be doing well with the liberty to work for themselves that was won in 1788.

A machine for locating thunderstorms and reporting them by radio, has been perfected at the Melbourne University, Australia.

The average life span of a tortoise is approximately a hundred years.

A barrel of crude petroleum yields about twice as many gallons of gasoline today as it did 16 years ago.

Satisfactory To Designers

United States New Airliner Has Passed All Tests

The giant new airliner, 42-passenger Douglas C-4, in 46 test flights has exceeded the predictions of its designers, it was announced at Santa Monica, Calif. The jet liner was built to the order of five United States airlines at a cost of nearly \$2,000,000.

The guaranteed high speed of 240 miles an hour was exceeded by a comfortable margin.

On four engines, during "saw-tooth" climbs, the plane rose above 25,000 feet with a full load.

On three engines the plane reached a ceiling of 20,000 feet.

The plane is 139 feet, three inches, from tip to tip, and 97 feet long.

Swing Music

Canadian Composer Says Jazz Is Due To Jittery Nervous Life

Sir Ernest MacMillan of Toronto, Canadian composer and symphony conductor, claimed at Vancouver that "jitterbugs," "jam sessions" and swing music were nothing new. All popular present day music is derived from negro rhythm, said Sir Ernest. He did not believe "swing music" would be very permanent. "Jittery" music is probably the result of the "jittery" nervous life people lead to-day," he said.

Threshing Resumed After Two Weeks Lay-off

Threshing is proceeding apace with ideal weather. Stooks and stacks have dried out very well. A week or ten days will see the most of it cleared up.

SEARLE PRECIPITATION RECK

The precipitation that has occurred during the months of August and September in Alberta, weighted for wheat acreage, has been 93 per cent of the normal. Saskatchewan, of the normal and Manitoba 57 per cent of the normal, giving a figure for the three provinces, weighted for wheat acreage, of 91 per cent of the normal.

In Alberta, crop districts 4, 15 and 17 are considerably below normal and crop districts 3, 8, 12 and 13 considerably better than normal. In Saskatchewan districts 1 and 2 are well below normal whereas crop districts 4, 7 and 9 are considerably better than normal. In Manitoba crop districts 2, 3, 4, 5, 6, 7, 8, 9 and 14 are much below normal and only crop districts 10 and 13 are better than normal.

Two precipitations which occurred in the fall months of August, September and October (between harvest and freeze-up) usually all penetrate into the ground and is available for next crop. Records show that this rain has an important bearing on the production of the succeeding crop.

There is of course a possibility that any deficiency that has occurred might be made up by better than normal rain during the present month of October.

National Fish Week

Ottawa (C. P. — Canada's fish week begins. In a statement issued, Hon. J. E. Michaud, minister of fisheries, said the Canadian people "who wish to help the fishermen and further the development of the fishing industry can take an effective step in that direction by joining wholeheartedly in the observance of arrangements for fish week," the statement continued, "are made by the fishing industry itself but the idea of observing such a week has my entire approval. I hope that the public everywhere throughout the Dominion will participate in the observance, giving thought to the national importance of the industry and making generous use of the excellent foods which the fishermen put upon the market at all seasons of the year."

"The fishing industry extends to every province and it follows that improvement in conditions in the industry as a result of increased popular interest and greater use of fish must bring benefit to every province."

DRESSED FILLETS OF HADDOCK

1 cup of milk
1/2 cup of flour
1 tablespoon of mustard
2 cups of grated old Canadian cheese
2 tablespoons of butter
fresh chopped parsley
1 egg
1/2 cup of white sauce with the butter, the flour, the mustard, and the milk add the grated cheese, season. Wire the fillets with a damp cloth, cut in individual pieces, cover each piece with the cheese mixture, sprinkle with chopped parsley, place on well-buttered oven dish, and cook 20 minutes in moderate oven. Fillets of any other kind of Canadian Fish may be used instead of Haddock fillets.

THE KIDDEYS' EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palate-pleasing flavour... yet so inexpensive that you will have money left over for extra meal-time treats.

You can enjoy Canadian Fish and Shellfish all the year round — over 60 different kinds — fresh, frozen, smoked, dried, canned or pickled... as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.
